ABOUT US

Established in 2012 with trade title *YDE Electromechanics Construction Ind. Trade. Co. Ltd.*, our company has always completed its works, undertaken by it, on due time and without any problems and set example in all works performed by it up to present thanks to its professionals specialized in their fields. The importance of customer satisfaction given by our company will be understood better from the fact that we have made works with same firm several times when our completed works are examined.

Moreover, *YDE Electromechanics Construction Ind. Trade. Co. Ltd.*, also conducts sales & marketing activity of its products that it will use on its electrical and mechanical contracting projects.

In addition to being able to offer turn-key projects which contains electrical-mechanical contracting works that many companies can not present simultaneously, *YDE Automation Electric Ind. Trade. Co. Ltd.* with its subsidiary, closely follows the latest technologies required by the era and also has an infrastructure to provide smart home and building automation systems to our valuable customers.

Electromechanics is our business...

OUR VISION

To become a brand that makes life easier in the contracting sector which provokes quality and confidence.

OUR MISSION

By offering electrical & mechanical contracting services together, understanding our customers' needs in the best way to meet and improve the confidence that we create with sustainable quality to increase our brand value.

OUR QUALITY POLICY

- ❑ To comply with laws and regulations in effect unconditionally
- ❑ To give priority to business ethics and social values over business
- ❑ To make the company a team with its all employees and entire management staff
- ❑ To adapt to technological developments rapidly
- ❑ Not to forget that durable material and permanent workmanship cannot be gained at low cost
- ❑ To give applied training and provide sustainability of qualified personnel
- ❑ To know that company's interests are the consequences of customer satisfaction
- ❑ Not to compromise from customer focused quality management system and to ensure improvement
- ❑ To analyze internal and external issues having effects on achievement of our targets and to approach systematic risks proactively and use opportunities
- ❑ To follow international standards and not to compromise from standards when performing works under no conditions
- ❑ To inspect and raise quality levels of our suppliers
- ❑ To be sensitive to changing market and customer needs, to be open to suggestions, to be fast and without faults
- ❑ To grow work volume, to contribute to country economy by means of performance of works abroad through its experience and acquisitions gained in Turkey
- ❑ To create opportunity for those in need with social responsibility consciousness
- ❑ To achieve satisfaction at the highest level by means of taking into account the expectations when fulfilling requirements of related parties during our activities.

OUR OCCUPATIONAL HEALTH AND SAFETY POLICY

- ❑ To comply with related legislations, administrative regulations and legal requirements concerning occupational health and safety in effect when performing our activities
- ❑ To create and spread occupational health and safety culture
- ❑ To use safe equipment and proper technologies for a healthy and safe working environment
- ❑ To hold training activities for creation and development of occupational health and safety consciousness and to ensure continuous improvement of current system
- ❑ To prevent occurrence of work accidents and occupational diseases by means of regular assessment of accident frequency rate and accident weighted rates and conducting effective risk assessments
- ❑ To ensure participation of each stage and stakeholders of the organization into activities on improvement of occupational health and safety practices
- ❑ To improve and continue training and activities for adoption of occupational health and safety principles given to our employees and employees of suppliers giving service, visitors, interns
- ❑ To adopt zero work accident and zero occupational disease target and to enhance efficiency by taking required measures
- ❑ To comply with the occupational health and safety legislations and other requirements of the countries where we perform activities.

OUR INFORMATION SECURITY POLICY

- ❑ To comply with Turkish laws and related legislations and administrative regulations concerning information security
- ❑ To protect confidentiality of all parties' information in personal and electronic communication and information exchange with third parties
- ❑ To give trainings to all employees in order to enhance information security consciousness
- ❑ To conduct reliable backup pursuant to information critical level
- ❑ To report dangers violations and failures in information security and to take preventive measures
- ❑ To ensure that internal information sources are not accessible by unauthorized persons
- ❑ To ensure that corporate information sources are not used for activities violating Turkish laws and related regulations.
- ❑ To address information security management system within frame of three fundamental components of risk management namely, confidentiality, integrity and accessibility and to provide framework for achievement of information security purposes by business consistency and continuously improve the system.

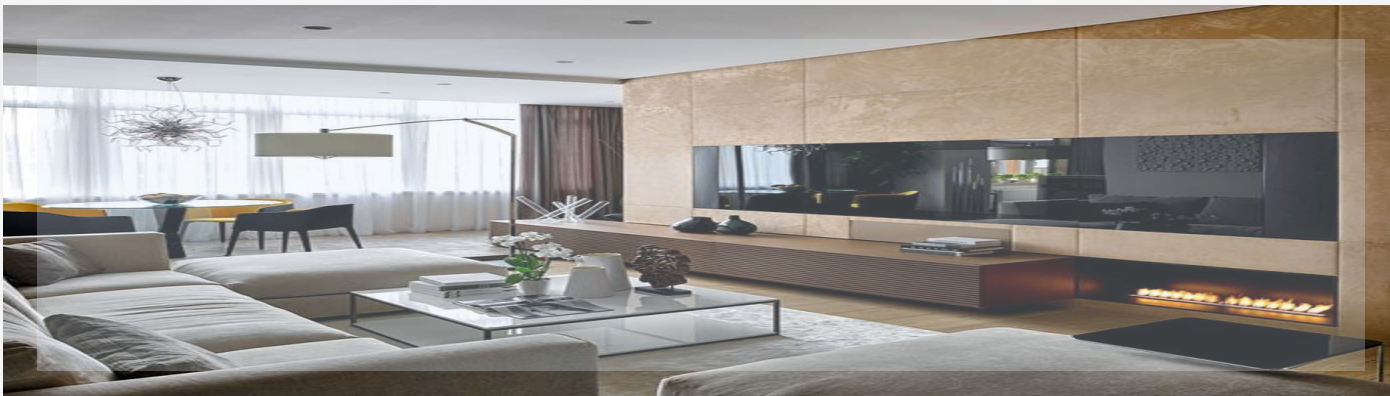

OUR SUBSIDIARY

❑ YDE Automation Electric Ind. Trade. Co. Ltd.

YDE Automation Electric Ind. Trade. Co. Ltd. by being the one of the strongest part of its affiliation YDE Electromechanics, is built by the aim of providing automation systems in Turkey, Smart Home Systems, Energy Management Systems, Low Voltage Systems, was established in order to provide specific solutions to individuals and Institutions.

YDE Otomasyon
Elk. San. ve Tic. Ltd. Şti.

FIELD OF ACTIVITIES

1. Electrical Contracting Services

Shopping Centers, Congress Centers, Hospitals, Hotels, Business Towers/Plazas, Housing, General Directorate Buildings for Organizations, Subway Lines & Stations Conference Halls and Organized Industrial Zones;

Electric Force Current Installation

Low Voltage and Medium Voltage
High Voltage Distribution Networks and Switchyards
Transformer and Generator Works
Medium Voltage Cells
Low Voltage Boards
BusBar Energy Distribution Systems
Uninterrupted Power Supply(UPS)Systems
Systems Grounding and Anti-lighting Protection

Electric Weak Current Installation

Fire Detection Systems ve Warning Systems
CO Gas Detection Systems
Emergency Announcement Systems
CCTV (Closed Circuit Television)
Images Surveillance and Recorder Systems
Television- Broadcast Satellite Services and Distribution Systems
SMARTV and IPTV Systems
Acces Control Security Systems(Card Access)
Data and Telephone Systems
Internal and External Ligthing Installation

Scada and Automation Works

Mechanical Automation Works
Dimmer and Lighting Automation Works
Heating, Cooling and all Ventilation Plants' Electrical and Automation Systems
Remote Meter Reading Systems
Energy Scada Systems

Mains High Voltage- Medium Voltage- Low Voltage Systems

Energy Transmission Lines Installation Works

Data and Network Systems
